Brightline Telecom - Retention Policy

SYNTHETIC DOCUMENT - generated for a hiring assignment. Fictional company; not real policy and not facts about the Telco dataset.

1. Purpose and scope

This policy tells Brightline Telecom retention agents which offers they may make to customers who are at risk of leaving. It applies to residential customers only.

Risk tiers use the churn risk score from the churn model. The score ranks customers by risk. It is not a calibrated probability, and agents must not quote it to customers.

2. Risk tiers and maximum discounts

Retention discounts apply to the internet plan charge only, never to add-ons or phone lines. The absolute cap on any retention discount is 30 percent. Only one retention offer may be active on an account at a time.

Tier	Risk score	Offer	Max discount	Duration	Approval
Low	below 0.35	Courtesy call	0%	n/a	Agent
Medium	0.35 to 0.59	Loyalty offer	10%	3 months	Agent
High	0.60 to 0.79	Retention offer	20%	6 months	Team lead
Critical	0.80 and above	Executive offer	30%	6 months	Retention manager

3. Eligibility exclusions

- A customer who accepted a retention discount in the last 12 months is not eligible for another.

- Accounts more than 60 days overdue are not eligible for any discount.

- Two-year contract customers with more than 6 months remaining get a 12-month price lock, not a discount.

- The new customer promotion is for new sign-ups only and can never be used as a retention offer.

A price lock is not a discount, so the first two exclusions do not stop an agent from offering one.

4. Contract offers, price locks and documentation

A month-to-month customer who accepts a one-year contract receives a one-time bill credit of $50. A one-year customer who renews for two years receives a one-time bill credit of $75.

A price lock guarantees the internet plan price for 12 months. Agents may offer it at any tier and it needs no approval.

Every offer must be logged with the ticket ID, tier, discount and duration. Offers above 20 percent must also record the approver's name.

5. How retention discounts combine with other discounts

Contract discounts (5 percent for a one-year contract, 10 percent for a two-year contract) and the $5 automatic payment credit are standing entitlements and still apply when a retention discount is given. Percentages are added together, not multiplied, and are taken from the list price of the internet plan.

The combined percentage discount on the internet plan may never exceed 40 percent. The automatic payment credit is taken off the total monthly bill after percentage discounts. A retention discount does not stack with another retention discount or with the new customer promotion.

Appendix A. Playbook by tier and contract

These entries restate sections 2 to 5 for each tier and contract type.

Low tier, Month-to-month customer

A customer on a month-to-month contract with a risk score of below 0.35 is in the Low tier and may receive the courtesy call. No retention discount is available at this tier. The agent makes a courtesy call and may offer a

12-month price lock. The agent may also offer a one-time $50 bill credit if the customer moves to a one-year contract. Log the ticket ID, tier, discount and duration.

Low tier, One year customer

A customer on a one year contract with a risk score of below 0.35 is in the Low tier and may receive the courtesy call. No retention discount is available at this tier. The agent makes a courtesy call and may offer a 12-month price lock. The agent may also offer a one-time $75 bill credit if the customer renews for two years. Log the ticket ID, tier, discount and duration.

Low tier, Two year customer

A customer on a two year contract with a risk score of below 0.35 is in the Low tier and may receive the courtesy call. No retention discount is available at this tier. The agent makes a courtesy call and may offer a 12-month price lock. If more than 6 months remain, the agent may offer only a 12-month price lock; with 6 months or fewer remaining the tier discount applies. Log the ticket ID, tier, discount and duration.

Medium tier, Month-to-month customer

A customer on a month-to-month contract with a risk score of 0.35 to 0.59 is in the Medium tier and may receive the loyalty offer. The maximum retention discount is 10% of the internet plan list price for 3 months and can be approved by the agent. With the 0% contract discount that is 10% off, against the 40% combined cap. The agent may also offer a one-time $50 bill credit if the customer moves to a one-year contract. Log the ticket ID, tier, discount and duration.

Medium tier, One year customer

A customer on a one year contract with a risk score of 0.35 to 0.59 is in the Medium tier and may receive the loyalty offer. The maximum retention discount is 10% of the internet plan list price for 3 months and can be approved by the agent. With the 5% contract discount that is 15% off, against the 40% combined cap. The agent may also offer a one-time $75 bill credit if the customer renews for two years. Log the ticket ID, tier, discount and duration.

Medium tier, Two year customer

A customer on a two year contract with a risk score of 0.35 to 0.59 is in the Medium tier and may receive the loyalty offer. The maximum retention discount is 10% of the internet plan list price for 3 months and can be approved by the agent. With the 10% contract discount that is 20% off, against the 40% combined cap. If more than 6 months remain, the agent may offer only a 12-month price lock; with 6 months or fewer remaining the tier discount applies. Log the ticket ID, tier, discount and duration.

High tier, Month-to-month customer

A customer on a month-to-month contract with a risk score of 0.60 to 0.79 is in the High tier and may receive the retention offer. The maximum retention discount is 20% of the internet plan list price for 6 months and needs approval from the team lead. With the 0% contract discount that is 20% off, against the 40% combined cap. The agent may also offer a one-time $50 bill credit if the customer moves to a one-year contract. Log the ticket ID, tier, discount and duration.

High tier, One year customer

A customer on a one year contract with a risk score of 0.60 to 0.79 is in the High tier and may receive the retention offer. The maximum retention discount is 20% of the internet plan list price for 6 months and needs approval from the team lead. With the 5% contract discount that is 25% off, against the 40% combined cap. The agent may also offer a one-time $75 bill credit if the customer renews for two years. Log the ticket ID, tier, discount and duration.

High tier, Two year customer

A customer on a two year contract with a risk score of 0.60 to 0.79 is in the High tier and may receive the retention offer. The maximum retention discount is 20% of the internet plan list price for 6 months and needs approval from

the team lead. With the 10% contract discount that is 30% off, against the 40% combined cap. If more than 6 months remain, the agent may offer only a 12-month price lock; with 6 months or fewer remaining the tier discount applies. Log the ticket ID, tier, discount and duration.

Critical tier, Month-to-month customer

A customer on a month-to-month contract with a risk score of 0.80 and above is in the Critical tier and may receive the executive offer. The maximum retention discount is 30% of the internet plan list price for 6 months and needs approval from the retention manager. With the 0% contract discount that is 30% off, against the 40% combined cap. The agent may also offer a one-time $50 bill credit if the customer moves to a one-year contract. Log the ticket ID, tier, discount and duration. Also record the approver's name, because the discount is above 20%.

Critical tier, One year customer

A customer on a one year contract with a risk score of 0.80 and above is in the Critical tier and may receive the executive offer. The maximum retention discount is 30% of the internet plan list price for 6 months and needs approval from the retention manager. With the 5% contract discount that is 35% off, against the 40% combined cap. The agent may also offer a one-time $75 bill credit if the customer renews for two years. Log the ticket ID, tier, discount and duration. Also record the approver's name, because the discount is above 20%.

Critical tier, Two year customer

A customer on a two year contract with a risk score of 0.80 and above is in the Critical tier and may receive the executive offer. The maximum retention discount is 30% of the internet plan list price for 6 months and needs approval from the retention manager. With the 10% contract discount that is 40% off, against the 40% combined cap. If more than 6 months remain, the agent may offer only a 12-month price lock; with 6 months or fewer remaining the tier discount applies. Log the ticket ID, tier, discount and duration. Also record the approver's name, because the discount is above 20%.

Appendix B. Worked pricing examples

Each example shows the internet plan charge. Percentages add; the automatic payment credit is taken off last.

Example 1: Low tier on DSL

A customer on DSL (25 Mbps, list price $25) with a month-to-month contract is in the Low tier and does not use automatic payment. The contract discount is 0%. There is no retention discount at this tier, so the internet charge stays at $25 per month.

Example 2: Low tier on DSL

A customer on DSL (25 Mbps, list price $25) with a one year contract is in the Low tier and pays by automatic payment. The contract discount is 5%. There is no retention discount at this tier, so the internet charge stays at $18.75 per month after the $5 automatic payment credit.

Example 3: Low tier on Fiber optic

A customer on Fiber optic (1000 Mbps, list price $50) with a two year contract and 4 months remaining is in the Low tier and does not use automatic payment. The contract discount is 10%. There is no retention discount at this tier, so the internet charge stays at $45 per month.

Example 4: Low tier on Fiber optic

A customer on Fiber optic (1000 Mbps, list price $50) with a month-to-month contract is in the Low tier and pays by automatic payment. The contract discount is 0%. There is no retention discount at this tier, so the internet charge stays at $45 per month after the $5 automatic payment credit.

Example 5: Medium tier on DSL

A customer on DSL (25 Mbps, list price $25) with a one year contract is in the Medium tier and does not use automatic payment. The contract discount is 5% and the maximum retention discount is 10%, so the combined

discount is 15%. The internet charge is $25 x (100% - 15%) = $21.25, giving $21.25 per month for 3 months. Afterwards the customer pays $23.75 per month.

Example 6: Medium tier on DSL

A customer on DSL (25 Mbps, list price $25) with a two year contract and 4 months remaining is in the Medium tier and pays by automatic payment. The contract discount is 10% and the maximum retention discount is 10%, so the combined discount is 20%. The internet charge is $25 x (100% - 20%) = $20, less the $5 automatic payment credit, giving $15 per month for 3 months. Afterwards the customer pays $17.50 per month.

Example 7: Medium tier on Fiber optic

A customer on Fiber optic (1000 Mbps, list price $50) with a month-to-month contract is in the Medium tier and does not use automatic payment. The contract discount is 0% and the maximum retention discount is 10%, so the combined discount is 10%. The internet charge is $50 x (100% - 10%) = $45, giving $45 per month for 3 months. Afterwards the customer pays $50 per month.

Example 8: Medium tier on Fiber optic

A customer on Fiber optic (1000 Mbps, list price $50) with a one year contract is in the Medium tier and pays by automatic payment. The contract discount is 5% and the maximum retention discount is 10%, so the combined discount is 15%. The internet charge is $50 x (100% - 15%) = $42.50, less the $5 automatic payment credit, giving $37.50 per month for 3 months. Afterwards the customer pays $42.50 per month.

Example 9: High tier on DSL

A customer on DSL (25 Mbps, list price $25) with a two year contract and 4 months remaining is in the High tier and does not use automatic payment. The contract discount is 10% and the maximum retention discount is 20%, so the combined discount is 30%. The internet charge is $25 x (100% - 30%) = $17.50, giving $17.50 per month for 6 months. Afterwards the customer pays $22.50 per month.

Example 10: High tier on DSL

A customer on DSL (25 Mbps, list price $25) with a month-to-month contract is in the High tier and pays by automatic payment. The contract discount is 0% and the maximum retention discount is 20%, so the combined discount is 20%. The internet charge is $25 x (100% - 20%) = $20, less the $5 automatic payment credit, giving $15 per month for 6 months. Afterwards the customer pays $20 per month.

Example 11: High tier on Fiber optic

A customer on Fiber optic (1000 Mbps, list price $50) with a one year contract is in the High tier and does not use automatic payment. The contract discount is 5% and the maximum retention discount is 20%, so the combined discount is 25%. The internet charge is $50 x (100% - 25%) = $37.50, giving $37.50 per month for 6 months. Afterwards the customer pays $47.50 per month.

Example 12: High tier on Fiber optic

A customer on Fiber optic (1000 Mbps, list price $50) with a two year contract and 4 months remaining is in the High tier and pays by automatic payment. The contract discount is 10% and the maximum retention discount is 20%, so the combined discount is 30%. The internet charge is $50 x (100% - 30%) = $35, less the $5 automatic payment credit, giving $30 per month for 6 months. Afterwards the customer pays $40 per month.

Example 13: Critical tier on DSL

A customer on DSL (25 Mbps, list price $25) with a month-to-month contract is in the Critical tier and does not use automatic payment. The contract discount is 0% and the maximum retention discount is 30%, so the combined discount is 30%. The internet charge is $25 x (100% - 30%) = $17.50, giving $17.50 per month for 6 months. Afterwards the customer pays $25 per month.

Example 14: Critical tier on DSL

A customer on DSL (25 Mbps, list price $25) with a one year contract is in the Critical tier and pays by automatic payment. The contract discount is 5% and the maximum retention discount is 30%, so the combined discount is 35%. The internet charge is $25 x (100% - 35%) = $16.25, less the $5 automatic payment credit, giving $11.25 per month for 6 months. Afterwards the customer pays $18.75 per month.

Example 15: Critical tier on Fiber optic

A customer on Fiber optic (1000 Mbps, list price $50) with a two year contract and 4 months remaining is in the Critical tier and does not use automatic payment. The contract discount is 10% and the maximum retention discount is 30%, so the combined discount is 40%. The internet charge is $50 x (100% - 40%) = $30, giving $30 per month for 6 months. Afterwards the customer pays $45 per month.

Example 16: Critical tier on Fiber optic

A customer on Fiber optic (1000 Mbps, list price $50) with a month-to-month contract is in the Critical tier and pays by automatic payment. The contract discount is 0% and the maximum retention discount is 30%, so the combined discount is 30%. The internet charge is $50 x (100% - 30%) = $35, less the $5 automatic payment credit, giving $30 per month for 6 months. Afterwards the customer pays $45 per month.

Appendix C. Common situations

How to handle situations agents meet often.

Situation 1

Situation: A customer says a competitor is cheaper and asks to cancel. Handling: Check the risk tier. Because the customer raised cancellation, the agent may present the tier offer. At the Low tier there is no discount, so the agent offers a courtesy call and may offer a 12-month price lock.

Situation 2

Situation: A customer asks for more than the tier maximum. Handling: Decline. No retention discount may exceed the tier maximum, and none may ever exceed the 30 percent cap, even with approval.

Situation 3

Situation: A customer asks to combine a retention discount with the new customer promotion. Handling: Refuse. The promotion is for new sign-ups only, and retention discounts do not stack with it.

Situation 4

Situation: A customer accepted a retention discount 8 months ago and calls again. Handling: The customer is not eligible for another discount, because 8 months is inside the 12-month window. A price lock may still be offered.

Situation 5

Situation: A customer wants the discount applied to Streaming TV. Handling: Retention discounts apply to the internet plan charge only, never to add-ons.

Situation 6

Situation: A customer on a two-year contract with 10 months left threatens to leave. Handling: Offer only the 12-month price lock, because more than 6 months remain. If the customer cancels anyway, the early termination fee in the service terms applies.

Situation 7

Situation: A Critical tier offer is ready to close but the approver is not recorded. Handling: The offer is incomplete. Offers above 20 percent must record the approver's name, so add it before the ticket is closed.

Situation 8

Situation: A customer asks the agent to quote their churn score. Handling: Do not quote it. The score is an internal ranking signal and not a probability.

Appendix D. Eligibility cases for High tier customers

Exclusions are checked in this order: overdue, recent discount, contract remaining.

Case 1: High tier, 0 days overdue

A High tier customer is up to date on payments, has never accepted a retention discount and is on a month-to-month contract. Result: the customer is eligible for the High tier offer of 20% for 6 months, because none of the exclusions apply. If an offer is made, the agent logs the ticket ID, tier, discount and duration.

Case 2: High tier, 0 days overdue

A High tier customer is up to date on payments, has never accepted a retention discount and is on a two-year contract with 8 months remaining. Result: the customer is eligible for a 12-month price lock only, with no discount, because more than 6 months remain on the two-year contract. If an offer is made, the agent logs the ticket ID, tier, discount and duration.

Case 3: High tier, 0 days overdue

A High tier customer is up to date on payments, has never accepted a retention discount and is on a two-year contract with 3 months remaining. Result: the customer is eligible for the High tier offer of 20% for 6 months, because none of the exclusions apply. If an offer is made, the agent logs the ticket ID, tier, discount and duration.

Case 4: High tier, 0 days overdue

A High tier customer is up to date on payments, accepted a retention discount 6 months ago and is on a month-to-month contract. Result: the customer is not eligible for another retention discount, although a 12-month price lock may still be offered, because a retention discount was accepted in the last 12 months. If an offer is made, the agent logs the ticket ID, tier, discount and duration.

Case 5: High tier, 0 days overdue

A High tier customer is up to date on payments, accepted a retention discount 6 months ago and is on a two-year contract with 8 months remaining. Result: the customer is not eligible for another retention discount, although a 12-month price lock may still be offered, because a retention discount was accepted in the last 12 months. If an offer is made, the agent logs the ticket ID, tier, discount and duration.

Case 6: High tier, 0 days overdue

A High tier customer is up to date on payments, accepted a retention discount 6 months ago and is on a two-year contract with 3 months remaining. Result: the customer is not eligible for another retention discount, although a 12-month price lock may still be offered, because a retention discount was accepted in the last 12 months. If an offer is made, the agent logs the ticket ID, tier, discount and duration.

Case 7: High tier, 0 days overdue

A High tier customer is up to date on payments, accepted a retention discount 18 months ago and is on a month-to-month contract. Result: the customer is eligible for the High tier offer of 20% for 6 months, because none of the exclusions apply. If an offer is made, the agent logs the ticket ID, tier, discount and duration.

Case 8: High tier, 0 days overdue

A High tier customer is up to date on payments, accepted a retention discount 18 months ago and is on a two-year contract with 8 months remaining. Result: the customer is eligible for a 12-month price lock only, with no discount, because more than 6 months remain on the two-year contract. If an offer is made, the agent logs the ticket ID, tier, discount and duration.

Case 9: High tier, 0 days overdue

A High tier customer is up to date on payments, accepted a retention discount 18 months ago and is on a two-year contract with 3 months remaining. Result: the customer is eligible for the High tier offer of 20% for 6 months, because none of the exclusions apply. If an offer is made, the agent logs the ticket ID, tier, discount and duration.

Case 10: High tier, 60 days overdue

A High tier customer is 60 days overdue, has never accepted a retention discount and is on a month-to-month contract. Result: the customer is eligible for the High tier offer of 20% for 6 months, because none of the exclusions apply. If an offer is made, the agent logs the ticket ID, tier, discount and duration.

Case 11: High tier, 60 days overdue

A High tier customer is 60 days overdue, has never accepted a retention discount and is on a two-year contract with 8 months remaining. Result: the customer is eligible for a 12-month price lock only, with no discount, because more than 6 months remain on the two-year contract. If an offer is made, the agent logs the ticket ID, tier, discount and duration.

Case 12: High tier, 60 days overdue

A High tier customer is 60 days overdue, has never accepted a retention discount and is on a two-year contract with 3 months remaining. Result: the customer is eligible for the High tier offer of 20% for 6 months, because none of the exclusions apply. If an offer is made, the agent logs the ticket ID, tier, discount and duration.

Case 13: High tier, 60 days overdue

A High tier customer is 60 days overdue, accepted a retention discount 6 months ago and is on a month-to-month contract. Result: the customer is not eligible for another retention discount, although a 12-month price lock may still be offered, because a retention discount was accepted in the last 12 months. If an offer is made, the agent logs the ticket ID, tier, discount and duration.

Case 14: High tier, 60 days overdue

A High tier customer is 60 days overdue, accepted a retention discount 6 months ago and is on a two-year contract with 8 months remaining. Result: the customer is not eligible for another retention discount, although a 12-month price lock may still be offered, because a retention discount was accepted in the last 12 months. If an offer is made, the agent logs the ticket ID, tier, discount and duration.

Case 15: High tier, 60 days overdue

A High tier customer is 60 days overdue, accepted a retention discount 6 months ago and is on a two-year contract with 3 months remaining. Result: the customer is not eligible for another retention discount, although a 12-month price lock may still be offered, because a retention discount was accepted in the last 12 months. If an offer is made, the agent logs the ticket ID, tier, discount and duration.

Case 16: High tier, 60 days overdue

A High tier customer is 60 days overdue, accepted a retention discount 18 months ago and is on a month-to-month contract. Result: the customer is eligible for the High tier offer of 20% for 6 months, because none of the exclusions apply. If an offer is made, the agent logs the ticket ID, tier, discount and duration.

Case 17: High tier, 60 days overdue

A High tier customer is 60 days overdue, accepted a retention discount 18 months ago and is on a two-year contract with 8 months remaining. Result: the customer is eligible for a 12-month price lock only, with no discount, because more than 6 months remain on the two-year contract. If an offer is made, the agent logs the ticket ID, tier, discount and duration.

Case 18: High tier, 60 days overdue

A High tier customer is 60 days overdue, accepted a retention discount 18 months ago and is on a two-year contract with 3 months remaining. Result: the customer is eligible for the High tier offer of 20% for 6 months, because none of the exclusions apply. If an offer is made, the agent logs the ticket ID, tier, discount and duration.

Case 19: High tier, 61 days overdue

A High tier customer is 61 days overdue, has never accepted a retention discount and is on a month-to-month contract. Result: the customer is not eligible for any discount, although a 12-month price lock may still be offered, because the account is more than 60 days overdue. If an offer is made, the agent logs the ticket ID, tier, discount and duration.

Case 20: High tier, 61 days overdue

A High tier customer is 61 days overdue, has never accepted a retention discount and is on a two-year contract with 8 months remaining. Result: the customer is not eligible for any discount, although a 12-month price lock may still be offered, because the account is more than 60 days overdue. If an offer is made, the agent logs the ticket ID, tier, discount and duration.

Case 21: High tier, 61 days overdue

A High tier customer is 61 days overdue, has never accepted a retention discount and is on a two-year contract with 3 months remaining. Result: the customer is not eligible for any discount, although a 12-month price lock may still be offered, because the account is more than 60 days overdue. If an offer is made, the agent logs the ticket ID, tier, discount and duration.

Case 22: High tier, 61 days overdue

A High tier customer is 61 days overdue, accepted a retention discount 6 months ago and is on a month-to-month contract. Result: the customer is not eligible for any discount, although a 12-month price lock may still be offered, because the account is more than 60 days overdue. If an offer is made, the agent logs the ticket ID, tier, discount and duration.

Case 23: High tier, 61 days overdue

A High tier customer is 61 days overdue, accepted a retention discount 6 months ago and is on a two-year contract with 8 months remaining. Result: the customer is not eligible for any discount, although a 12-month price lock may still be offered, because the account is more than 60 days overdue. If an offer is made, the agent logs the ticket ID, tier, discount and duration.

Case 24: High tier, 61 days overdue

A High tier customer is 61 days overdue, accepted a retention discount 6 months ago and is on a two-year contract with 3 months remaining. Result: the customer is not eligible for any discount, although a 12-month price lock may still be offered, because the account is more than 60 days overdue. If an offer is made, the agent logs the ticket ID, tier, discount and duration.

Case 25: High tier, 61 days overdue

A High tier customer is 61 days overdue, accepted a retention discount 18 months ago and is on a month-to-month contract. Result: the customer is not eligible for any discount, although a 12-month price lock may still be offered, because the account is more than 60 days overdue. If an offer is made, the agent logs the ticket ID, tier, discount and duration.

Case 26: High tier, 61 days overdue

A High tier customer is 61 days overdue, accepted a retention discount 18 months ago and is on a two-year contract with 8 months remaining. Result: the customer is not eligible for any discount, although a 12-month price lock may still be offered, because the account is more than 60 days overdue. If an offer is made, the agent logs the ticket ID, tier, discount and duration.

Case 27: High tier, 61 days overdue

A High tier customer is 61 days overdue, accepted a retention discount 18 months ago and is on a two-year contract with 3 months remaining. Result: the customer is not eligible for any discount, although a 12-month price lock may still be offered, because the account is more than 60 days overdue. If an offer is made, the agent logs the ticket ID, tier, discount and duration.

Case 28: High tier, 90 days overdue

A High tier customer is 90 days overdue, has never accepted a retention discount and is on a month-to-month contract. Result: the customer is not eligible for any discount, although a 12-month price lock may still be offered, because the account is more than 60 days overdue. If an offer is made, the agent logs the ticket ID, tier, discount and duration.

Case 29: High tier, 90 days overdue

A High tier customer is 90 days overdue, has never accepted a retention discount and is on a two-year contract with 8 months remaining. Result: the customer is not eligible for any discount, although a 12-month price lock may still be offered, because the account is more than 60 days overdue. If an offer is made, the agent logs the ticket ID, tier, discount and duration.

Case 30: High tier, 90 days overdue

A High tier customer is 90 days overdue, has never accepted a retention discount and is on a two-year contract with 3 months remaining. Result: the customer is not eligible for any discount, although a 12-month price lock may still be offered, because the account is more than 60 days overdue. If an offer is made, the agent logs the ticket ID, tier, discount and duration.

Case 31: High tier, 90 days overdue

A High tier customer is 90 days overdue, accepted a retention discount 6 months ago and is on a month-to-month contract. Result: the customer is not eligible for any discount, although a 12-month price lock may still be offered, because the account is more than 60 days overdue. If an offer is made, the agent logs the ticket ID, tier, discount and duration.

Case 32: High tier, 90 days overdue

A High tier customer is 90 days overdue, accepted a retention discount 6 months ago and is on a two-year contract with 8 months remaining. Result: the customer is not eligible for any discount, although a 12-month price lock may still be offered, because the account is more than 60 days overdue. If an offer is made, the agent logs the ticket ID, tier, discount and duration.

Case 33: High tier, 90 days overdue

A High tier customer is 90 days overdue, accepted a retention discount 6 months ago and is on a two-year contract with 3 months remaining. Result: the customer is not eligible for any discount, although a 12-month price lock may still be offered, because the account is more than 60 days overdue. If an offer is made, the agent logs the ticket ID, tier, discount and duration.

Case 34: High tier, 90 days overdue

A High tier customer is 90 days overdue, accepted a retention discount 18 months ago and is on a month-to-month contract. Result: the customer is not eligible for any discount, although a 12-month price lock may still be offered, because the account is more than 60 days overdue. If an offer is made, the agent logs the ticket ID, tier, discount and duration.

Case 35: High tier, 90 days overdue

A High tier customer is 90 days overdue, accepted a retention discount 18 months ago and is on a two-year contract with 8 months remaining. Result: the customer is not eligible for any discount, although a 12-month price

lock may still be offered, because the account is more than 60 days overdue. If an offer is made, the agent logs the ticket ID, tier, discount and duration.

Case 36: High tier, 90 days overdue

A High tier customer is 90 days overdue, accepted a retention discount 18 months ago and is on a two-year contract with 3 months remaining. Result: the customer is not eligible for any discount, although a 12-month price lock may still be offered, because the account is more than 60 days overdue. If an offer is made, the agent logs the ticket ID, tier, discount and duration.
